DETAILED ACTION

Claim Objections

Claims 1-10 and 12 are objected to because of the following informalities:

The recitation "two mutually displaceable Kelly rods adjacent to each other" in claim 1 is misleading. The mutually displaceable and adjacent rods cannot be interpreted to be the axially spaced rod segments of the inner Kelly rod, the outer Kelly rod nor both. Claims 2-10 and 12 depend from claim 1 and are likewise objected to.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-8, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hughes, U.S. 3,306,078.

Regarding claims 1, 4 10 and 12, as best understood by the Examiner, Hughes discloses a telescoping boring rod mechanism having concentric displaceable rods (12,10), one of which (10) constructed of metal and the other (12) constructed from adjacent segments (37,36) having means to transmit torque and made from a steel material (36) and an elastomeric (37) material.

As to claims 5-8, as best understood by the Examiner, Hughes discloses in figures 4 and 5 tubular segments having interlocking driving slots (between adjacent teeth 38 and 39) as means (39, 38) for transmitting torque and an axial force.

Allowable Subject Matter

Claims 2, 3 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten to overcome the objections set forth above and in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter including carbon-fibre reinforced plastic material, and the constructions and provisions of the rod segments.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-8, 10 and 12 have been considered but are moot in view of the new grounds of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the

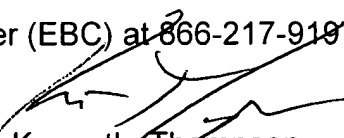

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
